**TOPIC : IOT BASED SAFETY GADGET
FOR CHILD SAFETY MONITORING AND
NOTIFICATION**

**ASSIGNMENT 2 : ASSIGNMENT ON
TEMPERATURE AND HUMIDITY SENSING AND
ALARM AUTOMATION USING PYTHON CODE**

CODE:

```
import random
while(True):
    a=random.randint(10,99)
    b=random.randint(10,99)
    if(a>35 and b>60):
        print("high temprature and humidity of:",a,b,"%", "alarm
        is on")
    elif(a<35 and b<60):
        print("Normal temprature and humidity of:",a,b,"%", "
        alarm is off ")
    break
```

OUTPUT:

The screenshot shows a Python IDE with a toolbar at the top containing icons for Run, Debug, Stop, Share, Save, and Beautify. The language is set to Python 3. The code in the editor is as follows:

```
1 import random
2 while(True):
3     a=random.randint(10,99)
4     b=random.randint(10,99)
5     if(a>35 and b>60):
6         print("high temprature and humidity of:",a,b,"%","alarm is on")
7     elif(a<35 and b<60):
8         print("Normal temprature and humidity of:",a,b,"%","alarm is off")
9         break
```

The output window shows the following results:

```
high temprature and humidity of: 47 77 % alarm is on
high temprature and humidity of: 50 80 % alarm is on
high temprature and humidity of: 36 78 % alarm is on
Normal temprature and humidity of: 25 45 % alarm is off

...Program finished with exit code 0
Press ENTER to exit console.]
